

CALKINS TECHNICAL
PRODUCTS, INC.

Since 1980

EXTEND THE LIFE OF YOUR EQUIPMENT

Calkins Technical Products, Inc. is a leading provider of fluid sealing products, lubrication technology and reliability based service.

We partner with our customers in delivering solutions that increase reliability, improve efficiency, conserve energy, and meet or beat the budget.

After more than 35 years working with maintenance managers, technicians and engineers, we've learned that our most important job is to make your job easier. That's the Calkins Value.

LUBRICANTS

Your fastest way to bottom line savings

Implementing the right lubrication technology is the easiest and fastest way to improved equipment performance and reduced operating costs. Calkins has high quality lubricants for every industrial application including FDA specifications.

Royal Purple lubricants

Royal Purple-Calumet produces high performance lubricants for nearly every industrial application. Strengthened with proprietary additives, they perform effectively over long periods of time, even in extreme environments.

Chemical Processing Magazine readers have voted Royal Purple one of the top three lubricants in the industry for 7 consecutive years.

Benefits of Royal Purple lubricants:

- Lowers operating temperatures
- Extends oil drain intervals
- Reduces bearing vibrations
- Provides rust and corrosion protection
- Reduces unscheduled downtime and maintenance
- Saves on energy costs
- Environmentally responsible product

FLUID SEALING

Protect your investment and boost reliability with quality seals, gaskets & packing

Nearly 70 percent of pump maintenance cost is due to mechanical seal failure. Prevent costly repairs and downtime with Calkins seals and seal support systems.

Our complete line of mechanical seals, seal support systems, gaskets, packing and bearing protectors can help keep your rotating equipment running at optimal performance. We can help you select the right fluid sealing solutions that can reduce power usage, maintenance costs and equipment downtime.

THE CALKINS VALUE

GASKETS

The right gasket at the right price

Calkins can provide the best industrial gasket for your application no matter the size, shape or material. With our automated gasket cutting operation, we can create standard as well as custom-sized gaskets – faster and at a lower cost than OEM providers.

We offer the flexibility to create your gaskets via three options:

1. We'll draw you a CAD file
2. Provide us with your CAD file
3. Send us your gasket and we'll scan it to create the CAD file

Calkins gasket analysis

Our experience indicates that incorrect gasket materials are used 10 percent of the time, leading to avoidable downtime. We can help you identify the right gaskets based on a number of factors including the equipment load, operating temperature range and the type of materials in contact with the gaskets.

The best pump solution for every industrial use

We are experts in a wide range of industrial pumps including Diaphragm, Submersible, Vertical Turbine, API, ANSI and Lobe configurations. Our technical specialists will assist you in selecting the right pump for your specific requirements and back it up with comprehensive post-sales support.

Knowledge to improve performance

Maximizing equipment performance takes more than great products and service. We partner with our vendors to deliver classroom-style and onsite facility training programs that can improve reliability and reduce costs. You'll learn best practices from industry experts on a wide range of topics including mechanical seals, gaskets, lubrication and more.

SERVICE

Entrust your predictive maintenance (PdM) and pump repair service to the experts

Predicting future equipment failure can have a major impact on both maintenance costs and plant productivity. Calkins employs the latest technology to monitor your equipment and identify problems before they wreak havoc on your operation. Our predictive and preventive services can reduce maintenance frequencies and minimize costly break-fix expenses.

- IR Thermal Imaging: Electric & Mechanical
- Condition Monitoring
- Laser Alignment
- Balancing

From minor pump repairs to major rebuilds, rely on Calkins to extend the life of your equipment and keep it running at optimal performance. Our factory trained technicians are on-call to quickly diagnose and repair a wide range of pump and seal issues.

- Pump & Seal Repairs
- Pump Maintenance & Inspection
- Pump Parts
